PRODUCT DESCRIPTION

EXOLIFT – MOTORISED CLIMBING ASSIST

Exolift is a lightweight, motorised climbing assist that helps technicians climb up and down ladders, for example in wind turbines or masts. The device supports around 80% of the user's weight, reducing physical strain and speeding up maintenance and repair work.

Technical data:

- Weight: 6.5 kg
- Load capacity: max. 120 kg
- Speed: 15–20 m/min
- Battery: rechargeable, lasts several hours
- Installation: strapped to the ladder, easy to move from one place to another

Exolift increases work efficiency and safety, reduces strain and shortens climbing time.
