LIFTING ACCESSORIES, DESIGN AND MANUFACTURE

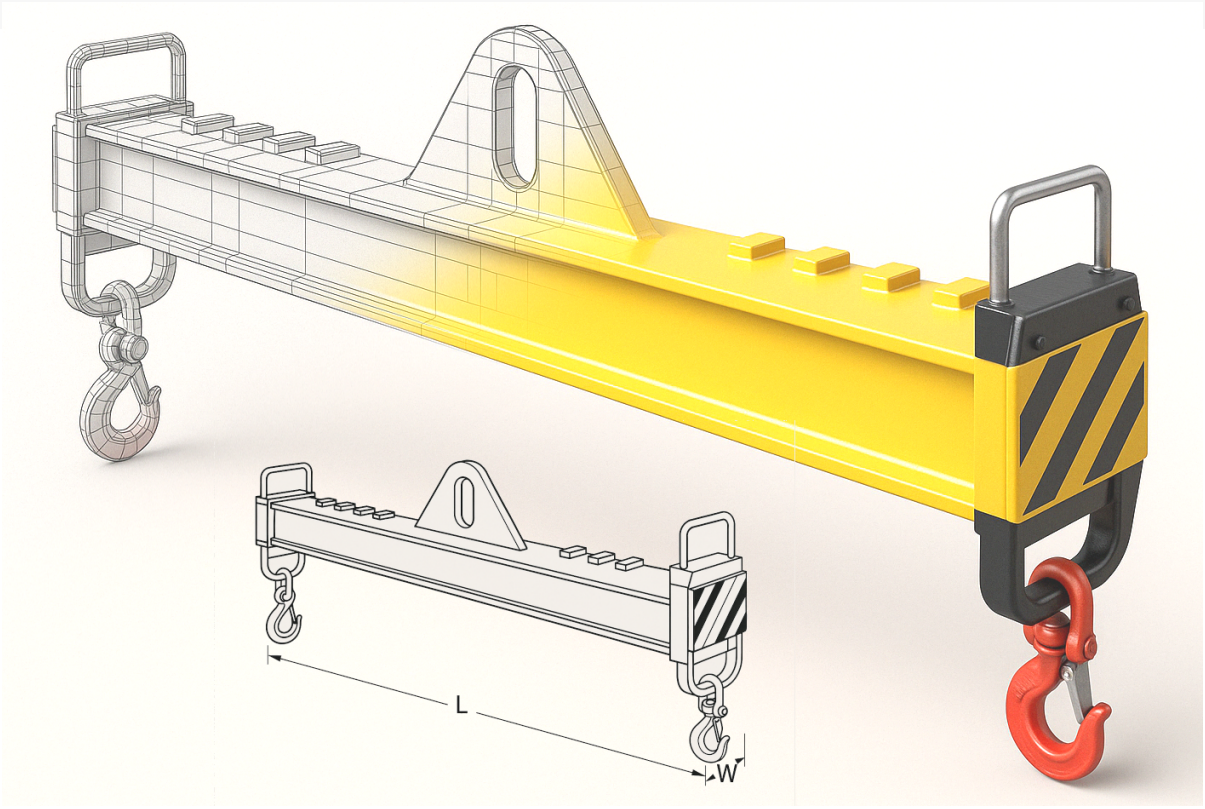

7500 kg

PRODUCT DESCRIPTION

We manufacture quality CE-marked lifting accessories such as lifting beams, lifting forks and grippers to the customer's needs and special requirements.

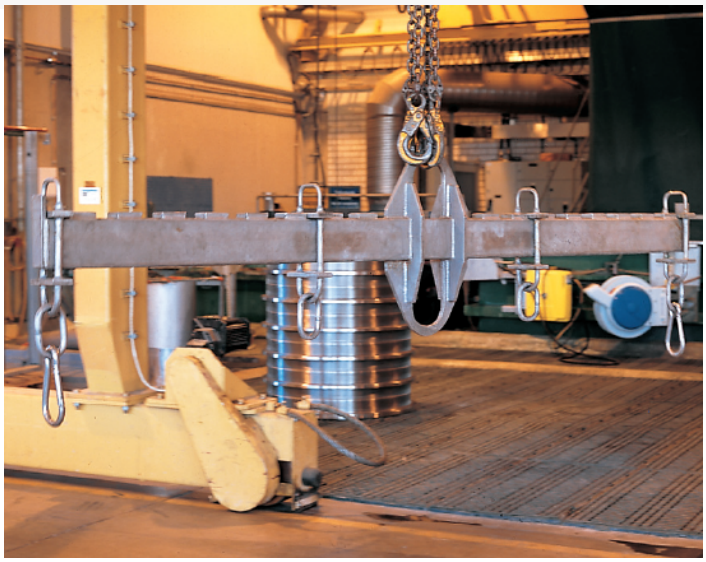

From idea to drawing, from drawing to lifting accessory.

We manufacture lifting forks for lifting and moving pallets, pipes and coils. Models range from single-tine to multi-tine versions, with either a fixed lifting eye or a self-balancing spring mechanism.

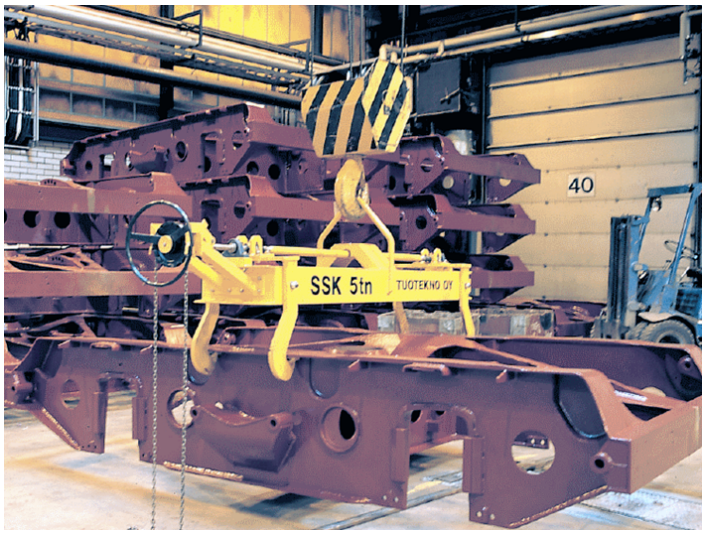

When designing lifting accessories, we take into account the customer's lifting needs, such as the special characteristics of the piece, the safety of the lifting work and the special requirements of the environment.

We document all the lifting accessories we manufacture and provide training in their safe use as the customer requires.

We map the customer's needs to find exactly the right solution, so that handling the pieces is easy and safe.

Acid-proof steel lifting beam in electrolysis use.

Lifting accessory for train bogies in use

Hydraulic 9-tonne forklift gripper loading concrete railway sleepers
