MONORAILS, SPECIAL STRUCTURES AND DESIGN

Tuotetekno Oy's structural steel monorails are durable and versatile solutions for crane use, especially at sites that need a fixed travel path. They are well suited to paint shops, galvanising plants, pickling lines and big bag handling, for example. Monorails can be installed on ceiling

structures or as free-standing units, and they support both manual and motorised trolleys. Capacities reach up to 10,000 kg.

PRODUCT DESCRIPTION

Tuotetekno Oy's **structural steel monorails** offer a durable and versatile solution for crane use, especially where loads are moved along a predefined route. Their robust structure allows longer support spans and wider compatibility with different trolleys compared with lighter crane tracks.

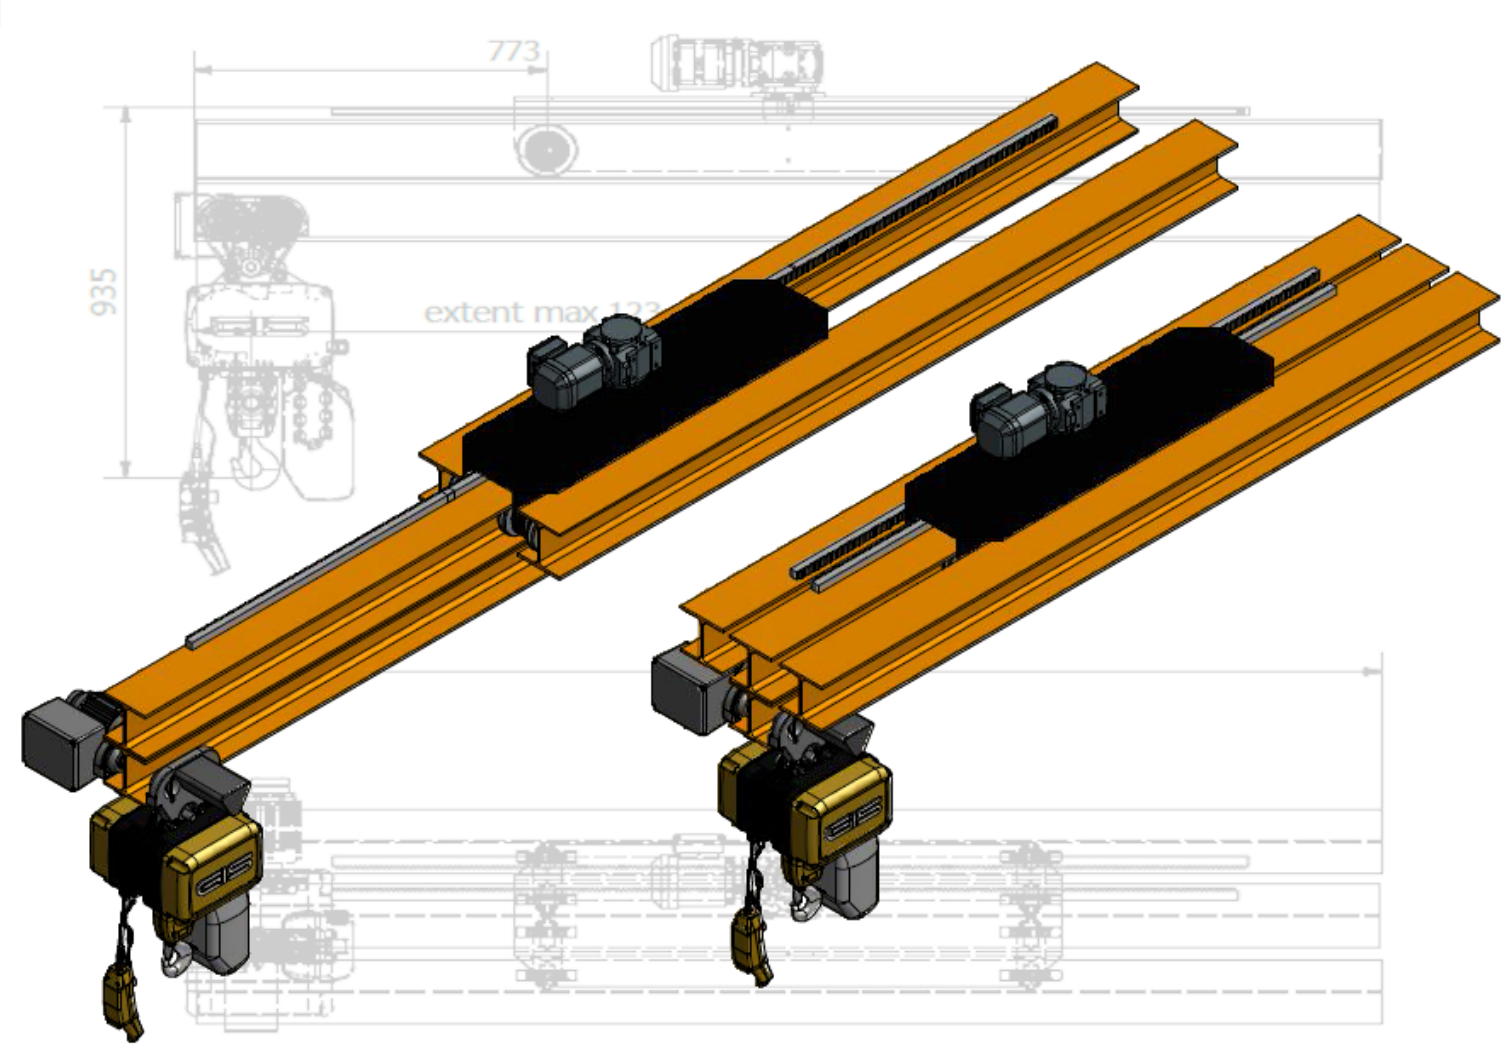

Features:

- Capacity: 125–10,000 kg
- Structure: high-strength structural steel
- Installation: ceiling-mounted, on hall structures or free-standing
- Suitable for manual and motorised trolleys
- Can be fitted with UNI-END end stops (no welding)

Applications:

Monorails are ideal for many industrial lifting and handling needs:

- Paint shops and surface treatment lines
- Galvanising plants and hot-dip galvanising units
- Lifting areas above pickling and washing tanks
- Moving tools and components to assembly stations
- Handling big bags or feeding raw materials to process equipment

Cantilever beam track extending in two directions, made for the customer's hoisting shaft
