# PLANETA LOW-HEADROOM MANUAL CHAIN HOISTS

Planeta LHT low-headroom manual chain hoists are designed especially for spaces with limited lifting height. A steel, chrome-plated PLS Premium series hoist combined with a specially designed manual trolley lets you lift almost to the level of the beam flange. The hoist is well

suited to damp and corrosive environments such as water treatment plants. Options include a chain bag, galvanised push trolley, powder coating, special chains (EX or stainless) and ATEX approval for explosion-hazard areas.

## PRODUCT DESCRIPTION

The high-quality Planeta LHT manual chain hoist – a chrome-plated hoist combined with a specially designed manual trolley – suits spaces where every bit of available lifting height is needed. The low-headroom combination is available with either a push trolley or a geared (chain-driven) trolley.

At its best in challenging conditions such as damp spaces, water treatment plants and corrosive environments that need a low-headroom hoist.

**Also available:**

- With chain bag
- With galvanised push trolley for damp environments
- With powder coating (in addition to chrome plating)
- With special chains (non-sparking EX or stainless chain)
- EX-protected, with ATEX approval for explosion-hazard areas
