PULLING WINCH APPLICATIONS

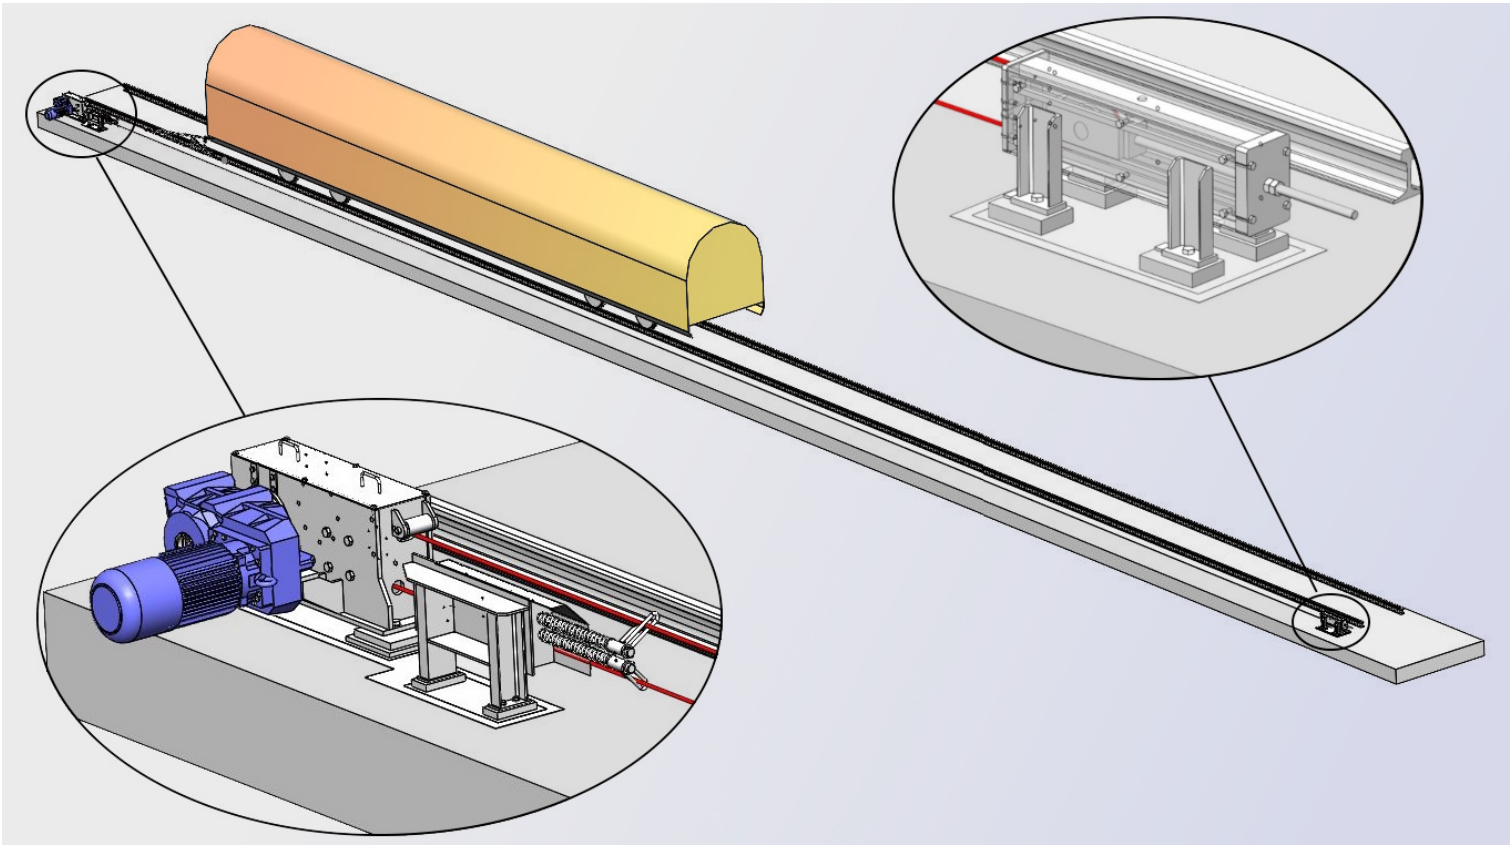

PRODUCT DESCRIPTION

Pulling winches are widely used in many types of work in ports, rail yards and on construction sites. Below are some applications.

A pulling winch is always chosen for the application: the load, pulling distance, speed, operating environment and control method determine which solution works best in practice. Tuotetekno helps dimension pulling winches for port, rail, construction site and industrial use.

See also pulling winches, all winches, LM winches and Motrix material winch.

Rail wagon pulling winch with two-way movement and travel limits.
