STEEL GANTRY AND SEMI-GANTRY CRANES

PRODUCT DESCRIPTION

Gantry cranes

Gantry cranes are versatile, efficient solutions when traditional overhead cranes or pillar jib cranes cannot be used. They are well suited to both indoor and outdoor use and add flexibility to material handling in various production and service facilities.

Tuotetekno Oy – steel gantry and semi-gantry cranes

Cranes made by Tuotetekno are designed for demanding conditions and are always tailored to the customer's needs.

Features:

- Capacity from 125 kg
- IPE or HE profile as the bridge beam
- Chain hoist or winch with trolley
- Electric hoist and power supply (C-rail and 3-phase plug) possible
- Can be fitted with 4 steering, swivelling and/or lockable wheels
- Quick to move and assemble
- Also available as a semi-gantry with wall or column mounting

Compact, portable workshop gantry cranes

These compact cranes are designed especially for workshops and other confined spaces that need a light, easily moved lifting solution.

Technical data (example models):

- Load capacity: 500–5000 kg
- Span: 2.5–8 m
- Welded steel frame
- Manual or electric hoist, manual load travel
- 4 swivel wheels, lockable
- Polyurethane wheels available as an option
- Structures can be dismantled for easier moving and storage

Note:

- Some models cannot be moved while a load is lifted
- Electrical accessories and safety switches available

Customisation and applications

All cranes are designed and manufactured to the customer's needs. They are especially suited to:

- Production facilities
- Repair shops
- Outdoor use on construction sites
- Situations where the crane must be movable or dismountable
